	ULTRADEV	ULTRAGILT	ULTRADRY	ULTRASOW	ULTRALAC
Bulk Code	60250	60260	60340	60300	60280
Best suited for:	<ul style="list-style-type: none"> Developing gilts UltraGilt used also for high producing lactating sows 		<ul style="list-style-type: none"> Gestating sows; mature boars 	<ul style="list-style-type: none"> All purpose lactating and gestating sow feed 	<ul style="list-style-type: none"> Lactating sows
General feeding recommendations	Feed <i>ad lib</i> from 90 kg liveweight to mating Feed 1.8-2.6 kg/hd/d during gestation depending on body condition and environment If UltraGilt used during lactation; feed <i>ad lib</i>		Feed 1.8-2.6 kg/hd/d during gestation depending on body condition and environment 2.7-3.3 kg/hd/d for mature boars	<i>Ad lib</i> during lactation	Introduce gradually from 5 days before farrowing and then <i>ad lib</i> during lactation. Supplementary wheat bran recommended at farrowing.
Digestible Energy (MJ/kg)	13.25	14.0	12.75	13.5	14.0
Avail Lys: DE	0.5	0.65	0.50	0.50	0.58
Minerals	Appropriate levels of calcium and available phosphorus for skeletal development in gilts and replacement of the losses in milk during lactation. Added trace minerals , organic chromium and organic selenium for sow health and reproductive performance.				
Vitamins	Optimised for the increased demands during gestation and lactation. High levels of Vitamin E for reproductive performance and Biotin for sound feet.				
Fibre	Appropriate fibre levels to maintain good dung consistency and minimise constipation problems				
Presentation	Steam pelleted for enhanced digestibility and palatability and lack of separation				

The 'ULTRA' range of feeds is available in Bulk only. Medications and other additives are optional at customer's request.
